Disasters:

Declaration Number

FEMA-4273-WV

Narratives

Disaster Damage:

Nearly 3,500 homes were deemed structurally damaged by FEMA and received funding for repair and replacement costs. At least 1,500 homes were destroyed and another 4,000 damaged in the flood. Additionally, over 2,300 properties were recorded as having an average high water mark of two feet or more in their homes throughout basements, first floors, and over roofs. Because of the inundation of water, 98% of these homes were deemed unsafe by FEMA with most lacking flood insurance. Over 3,400 applicants were approved for home repair amounts, with the average repair amount awarded being $8,200. Additionally, nearly 800 renters, including those who rented mobile homes, received rental assistance from FEMA to assist with temporary housing costs and personal property replacement. Over 1,400 renters applied for FEMA assistance with 780 approved for funding. The average award for renters was approximately $3,500. Over half of the renters approved for FEMA funding resided in four towns: Clendenin and Elkview along the Elk River in Kanawha County, and Rainelle and White Sulphur Springs in Greenbrier County. Although many renters from these impacted towns were approved for FEMA assistance, only 59 lessors of residential rental property, or landlords, applied for SBA loans, with a mere 29 ultimately approved for funding. Considering the high percentage of uninsured properties throughout the declared counties, it is presumed that there is a substantial share of landlords whose properties have gone unassisted since they are not eligible for FEMA repair funds and applications for SBA disaster loans has been low. Although $1.8 million in assistance to landlords has been approved through SBA business loans, only $200,000 has been disbursed thus far.
The June 2016 flooding caused significant damage to state infrastructure and facilities, such as wastewater treatment plants and educational facilities were among the most affected. The current calculated total impact to state infrastructure as of March 21, 2017 is $134 million per FEMA's Public Assistance obligated project details. This amount is expected to almost triple as new projects are approved and obligated by FEMA. Many of the small towns throughout West Virginia, such as Rainelle and Richwood, experienced heavy damage to their local water and wastewater systems. Thus, it will be incumbent upon the State to guide them through the FEMA Public Assistance process to have their systems restored and public services offered to the local constituency base once again. The West Virginia Department of Transportation (WVDOT) has reported an estimated $56 million of damage caused to the states highway system. A total of 1,300 different locations of state roads were washed out by flood waters and 123 bridges received damage. A total of 15 bridges were completely destroyed and 250 roads were closed due to the storms. Flood waters damaged a total of 67 schools, with five deemed substantially damaged and approved by FEMA for demolition and rebuild. The five substantially damaged schools are in the counties of Kanawha and Nicholas. In Kanawha County, Herbert Hoover High School and Clendenin Elementary were severely damaged. Water from the Elk River crested about 7 feet deep in the first floor at Herbert Hoover High School. Richwood High and Middle Schools, and Summersville Middle School were also severely damaged. The schools will have to be moved outside of the floodplain to minimize the effect of future flooding. There is currently no timeline for when all schools will be rebuilt. FEMA granted $2 million to aid recovery efforts for schools in Nicholas County. Specifically, the $2 million grant is being used to pay for temporary facilities. The WV Division of Natural Resources reported over $2 million in damage to the states public parks, recreation areas and wildlife.

Recovery Needs:

To determine the housing unmet need, the State first analyzed the 5,130 applicants to the FEMA Individuals and Households Program (IHP) who had a real property verified loss. Forty percent (or 2,088) of the FEMA applicants had an SBA status of FIT (failed income test). Such determination indicates that automatic referral to SBA's disaster loan program was bypassed and these applicants were instead referred directly to FEMA's Individuals and Household Grant Program. Additionally of the applicants who passed the income test and were automatically referred to SBA, twenty percent (or 376) failed the Fixed Debt Method analysis. West Virginia used SBA's disaster loan data for the flood and determined an average real property verified loss amount of $64,380 among 973 SBA disaster home loan applicants for a total verified loss of $62,642,237. The State analyzed the remaining 789 unapproved SBA disaster home loan applicants without a real property verified loss amount and found that they were almost all declined for an SBA loan for economic reasons. West Virginia applied the

average verified loss of $64,380 noted above to the unapproved population which yielded a total estimated verified loss for these 789 applicants of $50,795,820. Thus a total of $113,437,560 in real property verified loss was determined for the 1,762 applicants who applied for SBA assistance and were ultimately approved or denied a loan. The State reviewed the FEMA IHP dataset and determined that a total of 5,129 FEMA registrants had real property FEMA verified loss amounts. Applying the average SBA verified loss methodology above to this population yields an additional 3,367 applicants (5,129 FEMA applicants less 1,762 SBA referrals already accounted for) with a total of $216,767,460 in real property verified loss. The State reviewed the FEMA IHP dataset for renters and determined that of the 1,162 renters whose unit was inspected by FEMA a total of 783 had structural damage. Applying the average SBA verified loss methodology above to this population yields an additional $50,409,540 in estimated real property verified loss for rental properties. The State of West Virginia determined a total real property verified loss among its 5,912 potentially eligible applicants for housing repair and rehabilitation of $380,614,560. To complete the unmet housing needs assessment, the State reduced the total real property verified loss by FEMA repair payments ($28,656,603), NFIP building claim payments to individuals ($27,188,147), SBA home loans for real estate (27,373,186), and SBA business loans to lessors of residential buildings and dwellings ($1,902,900) to determine a total housing unmet need of $295,493,724.

Affirmatively Furthering Fair Housing
The States housing programs have been reviewed to ensure the activities will affirmatively further fair housing. Such review included an assessment of a proposed priority areas demography, socioeconomic characteristics, housing configuration and needs, educational, transportation, and health care opportunities, environmental hazards or concerns, and all other factors material to the AFFH determination. Applications should show and will be reviewed to determine whether projects are likely to lessen area racial, ethnic, and low-income concentrations, and/or promote affordable housing in low-poverty, non-minority areas in response to natural hazard-related impacts. Any subrecipients and partner agency will certify that they will affirmatively further fair housing (AFFH) in their agreements with WVDOC, and will receive fair housing training and technical assistance in carrying out all CDBG-DR activities to ensure fair housing obligations are met.

Overall Progress Narrative:

The West Virginia Division of Economic Development (WVDED, Grantee) has been working diligently trying to complete the CDBG-DR Program. Priorities remain focused around this program and returning survivors of the June 2016 disaster back to a safe and secure home.
On July 7, 2025, HUD approved an extension request which amends the grant period to end September 30, 2028.
During the reporting period, significant progress was made on the deployable flood barrier initiative, including the submission of 18 Environmental Reviews for potential installation sites. Initial outreach commenced with agreement letters emailed to contacts for four key locations: the Alderson Water Plant, Red Sulphur PSD UV Treatment Building, Alderson Post Office, and Rainelle Water Plant. Moving forward, site assessments will continue as needed, and contracting discussions are set to begin with flood barrier distributors and manufacturers.
Simultaneously, the West Virginia Housing Development Fund advanced the Buckeye CMS Rehab I project, which will rehabilitate 72 family and senior housing units across four sites in Nicholas and Webster counties. The Fund continues to review the project's application, coordinate regularly with the development team, and collect due diligence documentation to secure CDBG-DR funding and achieve closing in the third quarter of 2026. Rehabilitation work will begin shortly after closing, with construction completion targeted for the fall of 2027 and full lease-up expected soon after.
State Planning currently has two projects with Region 1 Planning & Development Council. A Water & Sewer Interconnection Study to identify, classify and prioritize critical infrastructure assets across Regions I and IV to support strategic interconnection planning, emergency response and long-term system resilience. The second study is a Brownfield's Housing Inventory Project to support regional redevelopment and housing efforts by identifying, assessing, and mapping potential Brownfield sites. Both planning projects are in Phase 2 and are well underway.

Activity Description:

The project is a “Pilot Demonstration: Installation of Deployable Flood Protection Systems at Selected Critical Infrastructure Locations for Increased Community Resiliency”. Deployable flood protection systems have been used in other countries for decades, and are gaining popularity in the U.S. Multiple deployable flood protection systems are now available, utilizing a variety of designs that provide flood protection, generally in the range of approximately 2 to 8 feet above surface elevation. A study conducted by Marshall University’s Center for Environmental, Geotechnical, and Applied Sciences (CEGAS) was completed in 2024 using HUD flood-mitigation funding to evaluate deployable flood protection systems that could be utilized to provide a level of flood protection for critical infrastructure facilities, many that were affected by the June 2016 flood event. Historical flood information, site conditions and “best-fit” protection system evaluations and data were compiled. A total of 50 locations were initially identified for evaluation. From this initial list, a total of 32 locations were evaluated for deployable flood protection systems, with recommendations included on the type of flood protection system best suited for the specific location (Note: Since issuance of the Final Report, additional flood protection systems are now available, potentially offering more suitable options; review of these systems will be included in this proposed project work scope). Locations will be identified from this evaluation and/or new locations may be identified for potential utilization of flood protection systems as part of this proposed effort. Locations are subject to change due to numerous factors, including changes in site conditions, changes in facility flood protection needs, and level of interest from each facility. Because this is a pilot demonstration, evaluation and use of various protection systems to demonstrate utilizations will be a goal. Project sites will tie back to the 2016 disaster in the 12 declared counties: MID (Clay, Greenbrier, Kanawha, and Nicholas) and NMID (Fayette, Jackson, Lincoln, Monroe, Pocohontas, Roane, Summers, and Webster). Project locations may not include all counties, but the MID counties will be the priority.

Location Description:

Activity Progress Narrative:

During this reporting period the following tasks were accomplished:
18 Environmental Reviews were submitted for potential sites for deployable flood barriers.
Initial emails with attached agreement letters were sent to contacts for the following locations:
Alderson Water Plant
Red Sulphur PSD UV Treatment Building
Alderson Post Office
Rainelle Water Plant
Continue site visits to locations where deployable flood barrier systems can be located will take place as needed. Contracting details will begin for deployable flood barrier
distributors/manufacturers.

Activity Description:

The project will include Rehabilitation of a scattered site, multi-family project. Three of the sites are located in one of our MID counties, while one is located in one of our NMID counties. This project will involve the rehabilitation of 16 units across 3 buildings in each of the 3 MID locations, that will serve families at or below 60% AMI. Additionally, it will include the rehabilitation of 24 units in 4 buildings designed for seniors at or below 60% AMI. According to a housing needs assessment conducted by the WV Housing Development Fund, the number of units of unmet need has increased from 2019 to 2024, indicating that this new project will help mitigate some of that demand.

Location Description:

Activity Progress Narrative:

Buckeye CMS Rehab I ("Project") is the rehabilitation of four scattered sites, which will be under common ownership. The Project is comprised of:
Carolyn Apts, 100 Carolyn Apts Lane, Craigsville, Nicholas County, WV 26205: 16 units serving families.
Kenneth E. Ritchie Apts, 100 Ritchie Apt Drive, Craigsville, Nicholas County, WV 26205: 16 units serving seniors.
Rose Mary Apts, 308 North Broad Street, Summersville, Nicholas County, WV 26651: 16 units serving seniors.
Vicki Lynn Apts, 15 Vicki Lynn Drive, Cowen, Webster County, WV 26206: 24 units serving seniors.
West Virginia Housing Development Fund (the "Fund") continues to process the Project's application with the goal to achieve closing and commitment of CDBG-DR funds during the third quarter of 2026. The Fund has regularly scheduled meetings with the Project's development team, is monitoring the closing list, and is

collecting due diligence documents in preparation for closing. The rehabilitation construction work will commence shortly after closing. Estimated construction completion will occur in the fall of 2027, and full lease up is anticipated shortly thereafter.
